# Problems and Challenges of Project Results at Institutional and National Levels

Difficulties in finding foreign teachers who teach similar in objectives and content of training courses

A limited number of foreign teachers who are interested in cooperation with Ukrainian universities and have the appropriate skills to use modern information technologies

Differences in the content and teaching time of similar educational programs in different countries

Difficulties in building partnerships through the lack of experience and confidence of teachers

Teachers need to spend a lot of personal time and additional resources for the development and use of e-collaboration tools

Low level of institutional support such innovation

# Prospects of Project Results Implementation at Institutional and National Levels

## Institutional Level

- A new level of cooperation within the framework of Erasmus + K1 and K2 through binomials by teachers
- Establishment of internal mechanisms for supporting and motivating teachers to participate in international (events)
- Project approach to the development of e-collaboration
- The quality of curriculum content through the introduction of international component
- The interest of students to the new methods of learning

## National Level

- Formation of necessary preconditions for entry into the international educational space
- The use of new e-learning co-operation methods in the development of higher education internationalization policy
- The use of quantity and quality of virtual internationalization projects in determining the universities' ranking
