Reform cluster (national level): Quality Assurance system development

- National QA policy, regulatory frameworks (including procedures, standards and criteria);
- QA models, practical mechanisms, procedures and tools ensuring effective functioning of external QA system at national (external evaluation) level
- Capacity building of national external evaluation body, including training of staff of National QAA to use QA tools and set external evaluation methods and criteria

- **Comprehensive analysis of QA system in Ukraine: legal environment, extant state at HEIs (national survey) with respect to ESG;**
- **Elaboration of a roadmap for QA system development basing on mapping existing procedures to new legal frame, EU best practices and ESG;**
- **Development of model for external QA system, its organizational infrastructure, mechanisms and tools with further piloting;**
- **Building capacity of national external evaluation body, including training of staff of newly established National QAA to use QA tools and set external evaluation methods and criteria.**

Challenges for full-size implementation of project results

Institutional level:

- Initial stage of internal QA systems development as well as QA, self-assessment and benchmarking traditions and culture.
- Insufficient capacity and understanding of HEIs of the role of QA system, its function and objectives;
- Necessity to change archaic “quality related” approaches to governance at institutional and AP levels, to establish wide interaction with main stakeholders;
- Shift from teacher-oriented to student-centered services, teaching and learning;

National level:

- Initial stage of external QA system development and National QA Agency establishment and functioning;
- Unclear situation with external evaluation policy and criteria, absence of mechanisms for ensuring consistency of judgments across institutions.

Prospects for implementation of project results

Institutional level:

- Establishment of internal QA systems at HEIs stipulated by new legislation and basing on ESG recommendations;
- Introduction/modernization of QA policies, procedures and respective standard criteria for academic programmes and institutional levels;
- Development of interaction activities with main stakeholders – students, graduates and employers to enhance the quality of APs;
- Continuing capacity building of HEIs staff to operate internal QA tools.

National level:

- Establishment of external QA system, elaboration of evaluation standards and criteria;
- Adequate functioning of National QA Agency;
- Continuing capacity building of National QAA staff to operate external evaluation tools.
