APPROVED PROJECT FOR FUNDING IN PAST 2 YEARS

The scope of the OCEAN project is to upskill partner NOCs' workforce in the field of climate action through a "Climate Action Officer" training course and provide them with the right tools and expertise so that they can lead the process of carbon reduction strategies' development in their respective NOCs.

"Sports as Value" is a capacity-building project in the field of sport that will involve 9 partners from 8 countries from the EU and the Balkan region. This collaboration will aim to build the capacity of sport clubs, organizations and federations to integrate positive values in the sport practice at the grassroots level in a structured, dynamic and systematic way.

The main purpose of the project is to make people comprehend the importance of health-promoting physical activity through voluntary activities in sports, social inclusion, equal opportunity and increased participation in sports and equal access to sports.

Women4Sport generally encourages gender equality in the key leadership and decision-making positions of the National Olympic Committees (NOCs) of Western Balkan (WB) countries by promoting structural changes in the governance, enhancing the understanding of existing cultural barriers, and encouraging the NOCs to work with their member Federations to create a sustainable change.

THANK YOU
