Short description of mobility and / or project idea(s) with Austria (200 - 500 words)			
<p>Conduct relevant research</p> <ul style="list-style-type: none"> We are dedicated to delving into the concept of lifelong learning within the context of social change processes, ongoing improvement of teaching and learning methods, impact of digital transformation on education sector, on the effect of migration. Issues relating to the professional handling of diversity in the face of social challenges and pedagogical demands as well as on those relating to school and teaching development in institutional contexts. To conduct a joint study of the emotional regulation of forced migrants and to develop practical measures for reducing their emotional distress. Training competitive professionals at up-to-date educational programmes. We, as Ukrainian higher education institutions, have to prepare competent motivated teachers for the successful implementation of the ongoing New Ukrainian School reform. The added value of the reform is in the transition from only knowledge and skills-based learning to competency-based learning, which involves the application of knowledge, skills and attitudes based on values to solve practical problems that may arise in real life. Sustainable post-war development of the country and European integration of Ukraine. Strengthening Resilience of Cultural Heritage at risk in a changing environment through proactive transnational cooperation is extremely valuable. Digitalization of education process. The possibility of cooperation in the spheres of Cyber-physical systems and Internet of things, gamified reality applications for real-world. Support of greening, digitalization and inclusiveness capacity building. Peacebuilding. Joint academic potential to elaborate more global themes in the framework of Peace and Security Education for Ukraine’s postwar recovery and reconstruction. Creation of the Peace and Security Building Center. The activities of such a center should include the provision of consulting services for non-governmental organizations, authorities; conducting trainings and workshops; preparation of educational, scientific and analytical materials with the aim of practical provision of social dialogue and consensus in Ukrainian society.

Academic field(s)	medicine, dentistry, pharmacy, paediatrics		
Short description of mobility and / or project idea(s) with Austria (200 - 500 words)			
<p>The DHLNMU is interested in the following forms of cooperation in the field of the academic mobility:</p> <ol style="list-style-type: none"> Student mobility for studies or for traineeships (up to 10 students per project) Staff mobility for teaching or for training (up to 10 staff per project) <p>The Capacity Building in Higher Education direction will include the creation and development of material and technical, medical, and research bases of the DHLNMU University Clinic for student training, patient treatment, and scientific research. The University Clinic will include the creation of the Rehabilitation Training Center for the professional training of doctors, interns, and students from the courses "Medical Rehabilitation," "Physical and Rehabilitation Medicine," and "Physiotherapy." Training staff in these specialties is a priority task of the Ukrainian healthcare system for rehabilitating military and civilian persons.</p> <p>The next element is providing modern diagnostics and equipment for the Center of Neurology at the University Clinic, which will enable the early diagnosis of neurological diseases (strokes, multiple sclerosis, epilepsy, dementia, and others) and significantly reduce the mortality rate, especially among vulnerable categories of the population. Employees of the surgery departments at DHLNMU need modern equipment to provide high-quality and effective medical care to numerous residents of the region and temporarily displaced persons from the war zone. Currently, the lack of high-quality medical equipment complicates operations and reduces the effectiveness of medical interventions. There is also a need to provide students with adequate opportunities to acquire surgical skills, which requires specialized surgical simulators to help them practice and improve their skills.</p> <p>A potential direction of cooperation is to update the Simulation Center for pediatrics, obstetrics and gynecology, and dentistry at DHLNMU. Training at the simulation center contributes to the continuous professional development of students, interns, and other healthcare professionals by helping them acquire modern practical skills, master the principles of teamwork, and follow current protocols and standards for providing medical care, ensuring maximum patient and medical staff safety.</p> <p>The University is also interested in potential scientific cooperation, particularly in the field of the history of medicine, especially the Austro-Hungarian period of the University's activity. These studies are actively carried out at the Department of Normal Anatomy, which houses a museum founded in 1894 by Henryk Karol Klemens Kadyi, a graduate of the University of Vienna and rector of the University of Lviv (1898—1899). The University's scientific activity can also extend to endocrinological studies of physiological and biochemical parameters in treating patients with post-traumatic stress disorder, as well as research in medicinal chemistry, specifically in searching for potential drug-like molecules with anticancer activity.</p>

Academic field(s)	Law, Law Enforcement, Economics, Psychology (Legal Psychology), Public Administration and Management		
Short description of mobility and / or project idea(s) with Austria (200 - 500 words)			
<p>The Erasmus+ program offers an excellent platform for fostering academic cooperation and enhancing mobility between Donetsk State University of Internal Affairs and prominent Austrian universities. This initiative aims to bolster educational ties, promote cultural exchange, and contribute to the development of comprehensive law enforcement education and practices through collaborative projects.</p> <p>Project Ideas:</p> <ol style="list-style-type: none"> 1. Exchange Programs for Students and Staff: Implement semester-long exchange programs where Ukrainian students can study subjects such as criminology, international law, and public safety at Austrian institutions. Conversely, Austrian students can engage in courses on Eastern European legal systems and cybersecurity at DonSUIA. Staff exchanges will focus on collaborative teaching, research projects, and sharing best practices in law enforcement education. 2. Joint Research Projects: Establish bi-national research teams to explore topics such as human trafficking, cybercrime, and transnational crime prevention. Workshops and seminars will be organized to disseminate research findings and develop innovative strategies to address these challenges. 3. Curriculum Development and Harmonization: Collaborative development of new courses and modules that incorporate best practices from both Ukrainian and Austrian educational systems. These might include e-learning components and simulation-based training. Regular curriculum review meetings will ensure the alignment with the European Higher Education Area (EHEA) standards. 4. Professional Development Programs: Organize training sessions, workshops, and summer schools on topics such as ethical policing, crisis management, and community policing. These programs will be jointly delivered by experts from both DonSUIA and Austrian universities. 5. Cultural Exchange Initiatives: Cultural exchange events such as language courses, cultural festivals, and joint participation in social and community projects. These activities will help build strong interpersonal relationships and foster a deeper understanding of each country’s cultural heritage.

Short description of mobility and / or project idea(s) with Austria (200 - 500 words)			
The main purpose of my visit as a representative of the administration of Lviv University and the Faculty of Foreign Languages to the Erasmus+ Cooperation seminar is to establish new and deepen existing partnerships with Austrian partners. Our areas of interest are not only mobility programs as such but also the exchange of experiences and knowledge that will help us create a new, high-quality educational space in Ukraine during serious challenges such as war and the post-COVID era.

Academic field(s)	Medicine, Dentistry, Nursing, Physical Rehabilitation, Technologies of Medical Diagnostics and Treatment, Public Management and Administration, Social Work		
Short description of mobility and / or project idea(s) with Austria (200 - 500 words)			
<p>Erasmus+ Key Action 1 Academic mobility for students and staff in subject area such as: Nursing, Technologies of Medical Diagnostics and Treatment, Physical Rehabilitation, Social Work, Medicine, Dentistry, Public Management and Administration</p> <p>Erasmus+ Capacity Building : SafeTraining: Pre-Hospital Emergency Care Training for Mine-Explosive Injuries. The main goal is a comprehensive learning course designed to equip various population groups with essential skills for providing pre-hospital emergency care to individuals with mine-explosive injuries. Develop tailored training programs for different groups, including first responders, healthcare professionals, and community members. Use a blend of online tutorials, hands-on workshops, and virtual simulations to ensure practical and effective learning on Ukrainian and English. Collaborate with medical experts and trauma specialists to create accurate and up-to-date training content.</p> <p>Erasmus+ European Universities: The University Medicine Alliance is committed to pioneering sustainable, responsible, and ethical approaches to teaching, learning, research, and innovation in medicine. Implementing cutting-edge teaching methodologies that emphasize sustainability and ethics. Focusing on research projects that address global health challenges and contribute to sustainable development. Creating training programs, didactic projects that enhance skills relevant to ethical and sustainable medical practice. Fostering interdisciplinary collaboration to integrate diverse perspectives and expertise in developing holistic solutions.</p> <p>Research areas in other projects: Military and tactical medicine, rescue-evacuation activities and ways to implement them. Physical rehabilitation of injured military and civilians. Study of post-traumatic syndrome; mental health. Burnout syndrome among doctors, educators, and representatives of other socially significant professions. Prevention, diagnostics and treatment of cardiovascular diseases. 3D –bioprinting in neurosurgery. Prevention, diagnostics and treatment of orphan diseases. Study of fundamental mechanisms of programmed cell death. Improvement of prevention, diagnostics, and treatment of viral and bacterial infections (tuberculosis) on the basis of studying their pathogenic mechanisms. Applying artificial intellect technologies in modelling epidemic process under condition of military action.</p>

Short description of mobility and / or project idea(s) with Austria (200 - 500 words)			
<p>Scope of cooperation: Key Action 1 (KA171) International Credit Mobility, Virtual Exchanges KSU is situated in the Southern Ukraine, in the city of Kherson, offering a variety of study programs for approx. 3,000 students. Since April 2022, due to military actions, KSU has been temporarily relocated to the safer region, Ivano-Frankivsk. Due to the relocation, KSU has limited capacity to provide all the necessary practical skills to students and can ensure mostly theoretical knowledge. Striving to maintain the academic standards, the goal of the mobility project is to strengthen the faculties' internationalization and create extra opportunities for students and staff affected by the war with the tools and capacities needed to support education and research, in conditions of lack of a permanent workplace and forced displacement. The project would have an immediate impact on its participants, students, staff, and departments by facilitating the curriculum improvement, development of joint courses or modules, academic networks, research collaboration and create the basis for further joint research/educational/capacity projects implementation. On the regional level, the project would create extra opportunities for students and staff from the Kherson Region, who have been affected by the war, and provide a safer and supportive environment for work and study. The project would facilitate the international academic cooperation, foster a cultural dialogue between Austria and Ukraine for sharing ideas and experience, which would enhance the capacity of Ukrainian education, as well as provide inputs for rebuilding of Ukrainian education during and in post-war period.</p>

Academic field(s)	Internationalization of Higher Education		
Short description of mobility and / or project idea(s) with Austria (200 - 500 words)			
<p>EUROPEAN VECTOR OF INTERNATIONALIZATION: STUDYING AUSTRIAN PRACTICES</p> <p>The project represents a comprehensive institutional initiative aimed at improving the internationalization of Ukrainian universities through the study of experience and internships in the international departments of Austrian higher education institutions. Practical results of the project will enable Ukrainian universities to adopt advanced practices and approaches used in Austria to enhance the quality of education, expand international cooperation, and improve their reputation at the international level.</p> <p>Project Goals: To conduct a comprehensive analysis of the work of international departments of higher education institutions (HEIs), the duties and responsibilities of staff in the context of developing and implementing internationalization strategies. Also, to study the experience of Austrian HEIs regarding the analysis and verification of the productivity of educational institutions in the context of internationalization strategy. To study the best practices of international activities of Austrian universities and prepare recommendations for the implementation of successful practices in Ukrainian universities.</p> <p>Project Tasks:</p> <ul style="list-style-type: none"> - Conduct a detailed analysis of the structure and functions of international departments of Austrian universities. - Study the duties and responsibilities of staff in international departments. - Investigate methods for the development and implementation of internationalization strategies. - Analyse and verify the productivity of educational institutions in the context of internationalization. - Identify best practices of international activities and prepare recommendations for Ukrainian universities. - Organize internships for Ukrainian representatives in the international departments of Austrian universities. - Prepare reports and recommendations for the implementation of successful internationalization practices. <p>The practical significance lies in the fact that the main conclusions and provisions of the project can be applied in the work of higher education institution managers in Ukraine to enhance the organization of work in structural units that coordinate the internationalization process and determine the main directions of educational process within the institution. Comprehensive and systematic application of the project results, alongside the significant scientific contribution of Austrian scholars in general, will contribute to the enhancement of the competitiveness of higher education institutions and the strengthening of Ukraine's position in the international market of educational services.</p>

Short description of mobility and / or project idea(s) with Austria (200 - 500 words)			
<p>Mykhailo Boychuk Kyiv State Academy of Decorative and Applied Arts and Design is interested in projects and collaborations of diverse fields of study, each filled with potential for innovative projects and exchanges. We are enthusiastic about fostering international cooperation to enhance these areas through shared knowledge, creative exchanges, and joint projects.</p> <p>Additionally, we are planning to implement a new program focused on media art, exploring contemporary methods and expressions in this dynamic field. This program aims to bridge traditional art forms with modern technological advancements, offering students and faculty new avenues for creativity and research.</p> <p>Given the recent destruction of part of our building due to a Russian rocket attack, much of our valuable archive of works remains hidden under rubble or destroyed. Consequently, we are particularly interested in projects centered on reconstruction, architecture, renovation, and the restoration of works of art. Collaborating on these projects will not only help rebuild our physical space but also preserve and rejuvenate our cultural heritage.</p> <p>We believe that through these initiatives, we can create a vibrant and resilient academic environment that contributes to the cultural and artistic prosperity of Ukraine. We welcome your ideas and look forward to exploring potential collaborations.</p>

Academic field(s)	Forestry; Energy Crops, Renewable Energy and Environment; Agrobiolgy and Soil Sciences; Food Technologies and Food Science		
Short description of mobility and / or project idea(s) with Austria (200 - 500 words)			
<p>Our main goal is to develop both aspects of cooperation with Austrian HEIs: academic and student mobility as well as scientific cooperation. Such cooperation is important for integrating science and education in Ukraine into the European Union. We have an agreement to cooperate under the Erasmus+ mobility program with the University of Applied Sciences Wiener Neustadt. And our idea is to develop mobility opportunities under the Erasmus+ program with the University of Natural Resources and Life Sciences (BOKU). As well as Erasmus+ mobility opportunities, we find short mobility programs for staff (1-2 months) are very productive and reasonable. Such programs allow staff to establish effective connections with relevant scientists and identify the best issues for further cooperation. We have already had such an experience of cooperation with a Swiss university, and this program has given good results and continues to work and produce results now.</p> <p>Our ideas for scientific cooperation are to develop academic cooperation through research projects, scientific publications, and the organization of various international events (conferences, workshops, etc.) to discuss scientific issues.</p> <p>Institute of Forestry and Landscape-Park Management of NUBiP of Ukraine has a long-term cooperation with the International Institute for Applied Systems Analysis (IIASA), which includes joint research projects and internships for scientists from Ukraine at the IIASA under the Young Scientists Summer Program (YSSP). We find such cooperation very useful for adapting and improving the Ukrainian science to the world quality. We look forward to supporting and expanding this cooperation with IIASA in the future.</p> <p>Main, but not all, areas of potential scientific cooperation:</p> <ul style="list-style-type: none"> • Forestry. Forest ecosystems services, bioproductivity of forests, carbon sequestration, fire monitoring and prevention (contact persons: Dr. Oleksandr Soshenskiy, soshenskyi@nubip.edu.ua, Prof. Serhiy Zibtsev, sergiy.zibtsev@nubip.edu.ua); • Agrobiolgy and Soil Sciences. Soil biome analysis, regenerative technologies, resource-saving technologies, remediation of soil methodology (with focus of contamination by military substances), ozonolytic transformation of organic raw materials into biologically active substances for the production of highly effective fertilizers, veterinary and medical preparations (contact persons: Prof. Oksana Tonkha, oksana16095@gmail.com, Dr. Olha Kravchenko, olha_kravchenko@nubip.edu.ua); • Energy Crops and Renewable Energy. Technologies for processing lignocellulosic raw materials of agricultural and municipal origin (using cavitation methods) in second-generation biofuel technologies, High-capacity combined energy storages for solar and wind power generation, Autonomous power supply systems, Smart electrical systems, heat pumps and hydrogen technologies in buildings (contact person Prof. Viacheslav Bratishko, vbratishko@nubip.edu.ua); • Food Technologies and Food Science. Biotechnology in food production, technologies for processing meat, aquatic bioresources, cereals, milk, fats, sugars, vegetables and fruits, improving public health by promoting healthy eating, development of nutritional recommendations for the population of the country, specific groups and individuals, research and improvement of quality and safety control in food production (contact person Dr. Mykola Nikolaienko, msnikolaienko@nubip.edu.ua).

Academic field(s)	Various fields		
Short description of mobility and / or project idea(s) with Austria (200 - 500 words)			
<p>1. Staff mobility: Possible areas:</p> <ul style="list-style-type: none"> Pharmacy, Chemistry Biology, Biochemistry, Ecology IT, Mathematics and related fields of study TESOL and Language Teaching English Philology Education and Teacher Training Ukrainian Studies, Literary Studies, Cultural Studies, Art <p>2. Cooperation in scientific projects: Ideas expressed so far:</p> <ul style="list-style-type: none"> German Language Studies (the field is disappearing in Ukraine. NMGSU is traditionally a centre for German Language Studies and can cooperate to change the situation). Biochemical and physiological mechanisms of development and correction of pathological conditions of the body (cardiovascular, excretory, nervous system, etc.). Biochemical mechanisms of biological activity of physiologically active substances. Regulation of growth and development of plants with the help of natural and synthetic substances. Problems of biodiversity conservation. Study of the influence of various factors on the quality of herbal medicinal raw materials. Methods of biological research in archeology. Monitoring and Diagnostics of Professional Competence in Pre-School Educators. Network development for long-life collaboration in research and computerized education in mechanical engineering, energy technology and data analysis. Search for compounds active against SARS-CoV, MERS-CoV and SARS-CoV-2 coronaviruses. Intensification of waste water disposal in order to completely stop carbon dioxide emissions into the atmosphere. Conversion of waste water into high-calorie fuel. Universities of the Third Age: Teaching English to Adults. TESOL: In 2013-2019 NSU participated in the "New Generation School Teacher" project organized by the British Council Ukraine. The project resulted in a new "English Teaching Methodology" course implemented in participant universities (approx. 10 around Ukraine). The course changed the Soviet era approaches to prospective FL teachers training. Further actions in the field of foreign language education can be beneficial for all the partners. <p>3. Art and museum conservation: NMGSU boasts the unique picture gallery and rare books collection, which are of value for the European culture not only for Ukraine. Due to the war, there is a need for the digitalization and preservation of art collections. Ukraine does not have relevant professional experience and collaboration with the Austrian institutions can really contribute to the sustainability of the cultural heritage.</p> <p>4. Joint publications, conferences and similar activities: NMGSU is starting updating the scientific journal for emerging researchers. Cooperative work in student researchers publication can be another project idea.</p>

Short description of mobility and / or project idea(s) with Austria (200 - 500 words)			
<p>Academic mobility is one of the priorities within the internationalization strategy of the University, it opens up new opportunities for students, faculty and staff of the University. Mobility of students and teachers is an important component of higher education system development in the framework of the strategy of the University, where mobility becomes an incentive to improve the quality of teaching, improvement of international activities and student services, compare and upgrade curricula. Mobility contributes to the development of the best strategy of internationalization, which everywhere is the catalyst of reforming the system of higher education. Mobility is important and useful, certainly, for students and for faculty and administrative staff of universities, exerting a positive influence on the quality of higher education in General through the formation and development of recognition. Academic mobility is a priority for relations between universities.</p>

Academic field(s)	<p>Biology: Microbiology and Biotechnology, Bioinformatics, Agricultural and Food Biotechnology, Marine research, Genetics, Metagenomics; Geology: Marine Geology, Physics and Astronomy: Sensor microelectronics, New materials and substances, Optical and Electrical Characterization of Thin Films and Nanolayers with Potential Novel Functionalities, Astronomic Observations of Space Debris; Environment: Hydrometeorology, Environmental protection, Climate Change, Economics and Management: Monetary Policy, Security and Investment, Digitalization of Economy, Economic Development of Countries; Business Ecosystems and Industrial Structure Formations, Sustainability impact on business strategies, Management Developments in the context of Industry 4.0, Boosting Innovation and Entrepreneurship: Key intakes of Startup Ecosystems; Law: Artificial Intelligence and Intellectual Property, Legal protection of AI-generated objects, Law of International Contracts, Corporate Law; Philology and Linguistics: Applied Linguistics, Methodology of Teaching German as a Foreign and a Second Language, Methodology of Distance Foreign Language Teaching, Multilingual Language Diagnostic Instruments, Practical and Theoretical German Phonetics, Slavonic Studies.</p>		
Short description of mobility and / or project idea(s) with Austria (200 - 500 words)			
<ol style="list-style-type: none"> 1. Double diploma programs (for masters) in Biology (Microbiology and Biotechnology, Bioinformatics), Management, Economics, IT (Information Systems, Computer Science) might be launched by ONU and Austrian Universities. ONU has some experience in this matter because it launched Double Diploma Master Program in Applied Mathematics with L'Aquila University (Italy) in 2020 as a part of RealMath Consortium (four cohorts enrolled successfully in 2020-2023). Also there are English taught master programs for foreign students in Management (launched in 2021), International Relations (launched in 2018), Information Systems and Technologies (launched in 2022), Biotechnology (launched in 2023), Physics and Astronomy (launched in 2023) and program like that in Meteorology is to be launched this year. 2. Academic mobilities under ERASMUS+ Inter-Institutional Agreements (KA1) as well as OeAD for students and staff (mainly in Biology, Hydrometeorology, Economics, Environmental Studies, International Relations and Political Studies, IT, Law, Management, Philology and Linguistics) might be launched. It is obvious there is no chance to fulfill full-scale exchange in time of war, so it means now only unilateral mobilities from Ukraine to Austria are possible. Nevertheless after war students from Austria could go to ONU and take classes in English on educational programs in Management, International Relations, Information Systems and Technologies, Biotechnology, Physics and Astronomy taught entirely in English (also there are elective courses in English on educational programs taught mainly in Ukrainian). Teachers from Austria are welcome to deliver usual ERASMUS+ 8 teaching hours in English at any educational programs in our University. 3. Support and promotion of studying German in ONU by German philologists as well as other students and staff (German language summer schools, any other trainings for students and staff etc). 4. Common and planned parallel research on the topics of joint interest (to be chosen from the above table where Academic Fields are mentioned) and short-term visits of staff as well as young researchers from ONU to the interested Austrian Universities to conduct joint studies. 5. Joint educational and research projects open for Non-EU countries (Horizon, KA2 CBHE etc) 6. Cooperation of Botanical Gardens 7. Black Sea and Lower Danube Research 8. There is also an idea of the International Digital Law Clinic providing legal help for Ukrainian Refugees in Austria based on common efforts of Ukrainian and Austrian students of law schools under supervision of trainers. Austrian students provide legal help under laws of Austria while Ukrainian students support communication with refugees with poor German and English, provide legal due diligence of documents issued in Ukraine as well as Ukrainian part of the legal background. Ukrainian and Austrian students communicate in English. The Clinic works also as a digital platform with a collection of legal advice and short videos.

Short description of mobility and / or project idea(s) with Austria (200 - 500 words)			
<p>We highly value the organisation and level of higher education in Austria, therefore Erasmus projects with Austrian Universities are key for us to achieve the goals of the University Development Strategy.</p> <p>With our capacities minimised by the Russian invasion, the projects of Student and Staff mobility, Capacity Building, European Universities, and Cooperation Partnerships will be able to support our higher education level based on the experience and achievements of Austrian universities.</p> <p>We need to ensure the training of highly qualified personnel for the post-war reconstruction of Ukraine, but necessarily using European standards and approaches including green transition, transforming into a smart, sustainable, and inclusive economy. Cultivating the basic values of the European Union (respect for human dignity, freedom, democracy, equality, the rule of law, and respect for human rights, including the rights of persons belonging to minorities or having special requirements) is vital for higher education. This is particularly important given the prospect of Ukraine's accession to the EU. Erasmus's projects in different academic fields will make it possible to achieve these goals and, in the future, to contribute to strengthening the EU as an actor in global governance with our team. However, the main idea behind the first step is to establish direct contact between our universities and our academics in the mentioned fields. My university is a leading classical university in the Centre and South-East of Ukraine with many scientific and educational directions. I would like to discuss all possible directions and mechanisms of cooperation with interested Austrian universities to submit joint Erasmus projects.</p>

Academic field(s)	Psychology, Social Work, Physical therapy and Rehabilitation, Computer Sciences, Biomedical Technologies, Permaculture, Teaching people with disabilities (Inclusive Education)		
Short description of mobility and / or project idea(s) with Austria (200 - 500 words)			
<p>Our primarily idea for mobility and / or project with Austria is a cross-cultural psychology project "Resilient Minds: Cross-Cultural Strategies for Preserving Psychological Health in Crisis Conditions". Resilient Minds aims to develop and share cross-cultural strategies for preserving psychological health during crises. By collaborating with Austrian psychologists, educators, and community leaders, the project will enhance the capacity of both communities to support mental health during challenging times, such as natural disasters, pandemics, wartime (Ukraine) or socio-economic crises. It could explore differences and similarities in psychological processes, attitudes, and behaviours between Ukrainians and Austrians. Topics like cultural influences on mental health, perceptions of well-being, or coping mechanisms in different societal contexts could offer valuable insights and promote cultural understanding. Additionally, exchange programs for psychology students could provide hands-on experience in diverse cultural settings. Psychology is one of the most popular specialities at our University. We have thousands of students at the level of bachelor's, master's, PhD's.</p> <p>The second idea for mobility and / or project with Austria is a cross-cultural ecology project "EcoConnect: Cross-Cultural Constructive Ecology and Permaculture". EcoConnect aims to foster cross-cultural exchange and collaboration between University "Ukraine" and Austrian partners by focusing on constructive ecology and permaculture practices. The project will involve knowledge sharing, joint workshops, and practical implementations of sustainable ecological practices that benefit both communities. Our strong point is educational program "Constructive Ecology and Permaculture" since 2021. Its purpose is to train specialists who are able not only to determine the state of ecosystems, but also to restore disturbed and to establish new ecosystems, including agro-ecosystems on the basis of permaculture and conduct eco-educational work in order to spread the ideas of permaculture. University "Ukraine" offers permaculture design courses as part of the curriculum to educate students, faculty, and staff about permaculture principles, ethics, and practices. Graduates of the EP "Constructive ecology and permaculture" teach the basics of permaculture at certification courses of permaculture design conducted by the PU "Permaculture in Ukraine" and conduct training in permaculture methods at various webinars, seminars and other events throughout Ukraine and abroad, in their own Educational and Demonstration permaculture centers and help in their organization in eco-villages or other places.</p>

Short description of mobility and / or project idea(s) with Austria (200 - 500 words)			
<p>We are interested in implementing academic mobility programmes for students and staff. Our priorities in the academic field are the implementation of joint educational programmes including within the framework of the CBHD and Erasmus Mundus projects. Our strong point is our close partnership with domestic and international business. Our goal is to develop unique joint educational programmes together with Austrian partners and business representatives in order to harmonise the requirements for university graduates on the part of employers and accelerate the adaptation of graduates in the real sector of the economy.</p> <p>Our scientists conduct research in the following areas:</p> <ul style="list-style-type: none"> • Remediation of soils affected by military aggression; • Protection of biodiversity and ecosystem services; • Diagnostics of plant pests and diseases; • Features of feeding brown cows in the production of organic dairy products; • Sustainable rural development; • Producing and marketing quality organic products; • Harmonization of Ukrainian legislation in the context of European integration; • Energy-efficient materials and constructions in civil engineering and architecture; • Deep soil mixing methods for soil reinforcement; • Food-safety and risk analysis. <p>Within the framework of these topics, we propose the creation of joint research teams that will select material for study and conduct further analysis on the basis of Austrian scientific laboratories. We are also interested in studying European experience and best practices on these topics and their application to the current Ukrainian realities, given the conditions of war.</p>

Personal experience in international cooperation projects (MAXIMUM 150 words)			
<p>As a head of International Cooperation Department I responsible for supporting and developing foreign relations in educational, scientific, social and cultural spheres. With my experience of more than 20 years in sphere of international grants and contracts with foreign companies, Embassies, missions and NGOs in Ukraine I was a manager and participant of many international, national projects and programs as well as at Erasmus, Erasmus+, Horizons programs. International projects are dynamic and constantly evolving, presenting new challenges and opportunities at every step. Therefore, it is important for me as a manager to adapt plans and reflect on experiences and lessons learned.</p>

Academic field(s)	Philology (German language (incl. DAF) and literature, English language and literature), Slavic Studies, Jewish Studies, European Studies, Education, History, International Relations, Political Sciences, Sociology, Economics, Management, Hospitality Management, Sports, Law, Computer Sciences, Engineering Sciences, Biology		
Short description of mobility and / or project idea(s) with Austria (200 - 500 words)			
<p>Mobility:</p> <ol style="list-style-type: none"> 1) AT to UA students: virtual mobility (internships) for Master students majoring in German as a foreign language and willing to practice in teaching in to UA BA students studying German. 2) AT to UA staff: virtual and physical mobility for academic staff interested in field research in Conflict and Violence Studies, Sociology of War and any other topics related to the ongoing conflict, as well as any other academic field listed above 3) UA to AT students: physical mobility (3 to 5 places a year per academic field listed above, including Bachelor, Master and PhD students) 4) UA to AT staff: academic staff, administrative staff dealing with research management, internationalization and HR (job shadowing). <p>E+ KA2 CBHE:</p> <ol style="list-style-type: none"> 1) Leadership and HR development for UA HEIs: the project addresses the lack of a strategic approach to human capital development at UA HEIs. It will result in development and establishment of a holistic leadership development program at selected UA HEIs, encompassing Personnel Departments' transformation into Human Resources Development departments, strategic planning, and training (job shadowing) components, aligned with EU HRS, HRS4R, OTM-R, National HE Development Strategy (2022-2032) 2) Teacher training on STEM education: the project addresses the growing need for schoolteachers trained in STEM methodologies and approaches. It will result in an innovative interdisciplinary Master program in STEM education to be developed by selected UA HEIs, with a specific focus on project-based and problem-based learning, as well as with the extended practical component. STEM EdSpaces will be created at selected UA universities as regional hubs for advanced teacher training on STEM education.
